

Accessibility Modifications

Traditional remodelers do not consider the needs of those who are seniors or have special needs. Everyday life in the home can be really hard. We understand these difficulties and can make modifications to your home so your life is a little easier and more productive.

We understand that physical changes often call for specialty products and services. We are here to help create solutions to challenges you or someone you know may be facing.

CAPS Designation

The CAPS designation is a reliable way to identify professionals to modify your home.

The Certified Aging In Place Specialists can design and help you build an aesthetically enriching, barrier-free living environment. The CAPS professional goes beyond the design to address the codes and standards, common remodeling expenditures and projects, product ideas and resources needed to provide comprehensive and practical solutions.

The goal of any CAPS project is to blend the aging in place features with a home's style, in as seamless a manner as possible.

- Systems
- Controls
- Kitchens and Baths
- Access

- Cleaning & Maintenance

EMBRACE THE LIFESTYLE

Millions of Americans are living longer and more active lives. In embracing newly found and changing lifestyles, a need to revitalize the home environment has risen.

Many are not aware of the options and related benefits to home modifications and the benefits of working with an Aging In Place Specialist. Aging In Place means that clients don't need to move from their homes in order to accommodate their changing needs.

Proactive planning can make the home more comfortable and appealing and inherently add value to the home. Increased visibility or easier recovery from an accident or illness offer benefits. Home modifications can help you avoid injury and live with greater safety and independence.

Your life and the lives of friends or family can be greatly enhanced.

HOME MODIFICATIONS

Certain conditions can increase the need for environmental modifications to support independence and promote safety.

Arthritis

Respiratory Challenges

Diabetes

Orthopedic issues: hip and knee

Residual effects from stroke

Progressive diseases: MS, Parkinson's, ALS

Traumatic Injuries: brain, spinal cord
