

STONE SPECIALISTS

Getting a Countertop Quote

- Visit our Studio and Showroom located in Elkhorn, WI.
- Bring samples of your cabinets, tile or other flooring material, and any other samples that will help you select the stone that best fits your project.
- Bring a cabinet layout.
- During your visit to our showroom we will show you our wide variety of countertop material. You may take samples home with you.
- If you do not bring the layout with you when you visit us feel free to e-mail or fax us this information. Please provide us with as much information as possible.

This Information Includes:

- -Layout and measurements
- -Stone name (if known)
- -Edge Detail (if known)
- -Personal information such as the job address, contact information, and any other details that will help us determine the quote for the job.

All estimates are based on the dimensions provided to us.

In order for us to take measurements, make necessary templates, and install the following is required...

- Cabinets must be installed, and securely fastened, aligned and top leveled at proper elevation.
- The sink either needs to be on location or the sink template brought to us.
- All other fixtures such as faucets, soap dispensers, water taps, sprayers, cook-tops, dishwashers, and any other items that will be placed in the countertop also must be on location at the time of measuring.
- Unless we are removing the existing countertops, those will need to be removed by others.
- The final price will be confirmed based on the measurements taken on the job.
- If the stone is not consistent in structure, it would be in your best interest to visit one of our suppliers, and pick out the actual slab that will be used for your project (See Natural Stone Suppliers).

-We look forward to doing business with you-
